COOLING SOLUTIONS

# NEW ICEBRIDGE COOLING CHEST

New, advanced laser treated surface.  
Improved durability and performance.  
New Uni-body feature with side grooves.

*The Icebridge® HD Series Cooling Chest is designed mainly for fresh food items, but can also be used for frozen and hot food items. The product is suitable inside ATLAS trolleys and Standard units.*

Fresh food items can be kept chilled between +1 – +7 °C for up to 23 hours with the reusable Icebridge Cooling Cassette. Preheated food items can be kept at +65 °C for up to four hours.

## PRODUCT HIGHLIGHTS

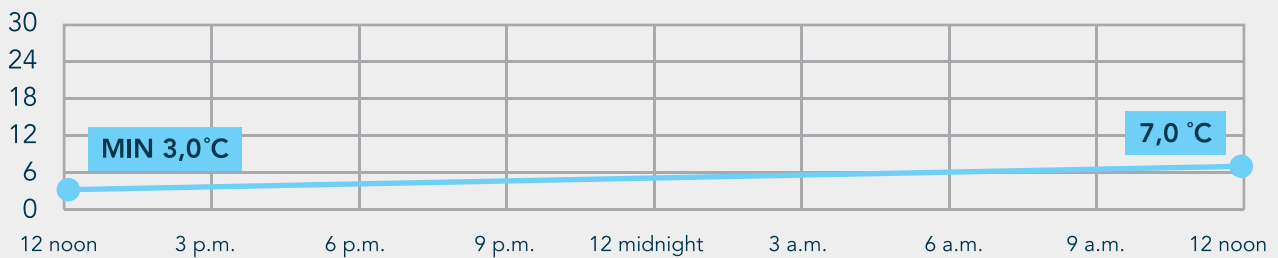

Multiple use for fresh, frozen and hot meal items.

Provides flexibility for airlines operating multiple leg flights with a single catering uplift.

Optimal for buy-on-board concept.

Extremely durable, ultra-light weight and washable in the catering tunnel washing machine.
